WHAT'S NEW IN THIS VASL VERSION – VASL6.6.9-beta8

New Features

Counters:

Play:

Auto-reveal functionality for HIP fortifications now includes minor bug fixes

Linked Pieces now display range

Setup and System:

Twilight of the Reich boards, overlays, and counters added VASL

A new Scenario Setup files extension has been released with 400 setup files. Code in VASL669-beta4 supports that automatic version update to these files, currently at 668 and will all to moved to 669 at the time 669 is issued. No more outdated Scenario Setup files.

Overlays 1 – 10 now work with LOS.

New preference allows for a "ROF" die to be rolled and displayed separately for IFT and TH DR. Select the Preference and the die color and it will appear at the end of the text in Chat when rolling IFT/TH.
